

Nase Solorzano Jennyfer Nicole, Ñacato Toapanta Angie Nicole, Palomo Otto Cristian David

|  | MINUTES OF THE MEETING |                |                  |
|-----------------------------------------------------------------------------------|------------------------|----------------|------------------|
|                                                                                   | Bug Correction         | Meeting No: 02 | Date: 13/05/2026 |
|                                                                                   |                        |                | Sprint No: 02    |

- **Data Type Validation Failure:** It was identified that the system accepts numbers in fields intended exclusively for text, due to the lack of a filter that restricts non-alphabetic characters, affecting the integrity of the data entered.

- **Date Validation Error:** The system is using the current date incorrectly and is also not validating if the entered date is too old.  
There is an error in the formula for calculating weeks of pregnancy.  
There may be a problem with calendar handling or a date discrepancy.

- **Character Encoding Error:** The character "ó" appears incorrectly represented (¿), which indicates a text encoding problem (UTF-8/ANSI)

```
--- Prenatal Calculator (Hospital de Calderón Standards) ---
Method: 1. LMP (FUM) | 2. Current Week (Direct)
1
Enter Date of Last Menstrual Period (YYYY-MM-DD): 2028-08-10

-----
>>> RESULT: WEEK -117 OF PREGNANCY
>>> TRIMESTER: 1st Trimester
>>> ESTIMATED DUE DATE (FPF): 2029-05-17
```

- **Time Validation Error:** The system asks you to enter (HH:mm) but the user only entered the time and the system accepted it as valid, this means that the time format HH:mm (for example 14:00) is not being validated correctly.

```
--- Medical Appointment Record ---
Enter date (YYYY-MM-DD): 2006-8-20
Enter time (HH:mm): 14
Registered. Upcoming:
- Date: 2006-8-20 | Time: 14
```

- **Lack of detailed confirmation:** It does not indicate ID, date, patient, or specific registration confirmation.

The interface is in English: "Persist Medical History" but the note is in Spanish. This can create an inconsistent user experience if the system is not designed to be multilingual.

```
--- Persist Medical History ---
Enter note: esta bien la señora
History Records Saved.
```

Nase Solorzano Jennyfer Nicole, Ñacato Toapanta Angie Nicole, Palomo Otto Cristian David
